APPENDIX E—
PRESENT VALUE TABLE

1. In CIVJI §12.09.5, CIVJI §13.09.3, CIVJI §13.10.5, CIVJI §13.10.9, and CIVJI §13.11.4, reference is made to present value tables. In most instances, the parties will either call or file an expert's report as to future loss of income based on present value tables. Occasionally, this is not done. The jury must then decide the present value of any future loss.

2. The calculations shown in the attached Present Value Table Payment appear, in more comprehensive form, in several sources, including M. Berenblut and H. Rosen, *Litigation Accounting, The Quantification of Economic Damages* (Carswell, 1995).

3. In British Columbia, 1.5% is the rate of interest that must be used to calculate the present value of any future income loss. The figure of 2.0% must be used to calculate any other future losses; e.g., cost of future care. See *Law and Equity Act*, R.S.B.C. 1996, c. 253, s. 56; and the Law and Equity Regulation, B.C. Reg. 352/81.

   The discount rate in British Columbia is set by the Chief Justice of the Supreme Court of British Columbia under the *Law and Equity Act*, R.S.B.C. 1996, c. 253, s. 56, and the Law and Equity Regulation, B.C. Reg. 352/81. See also information about discount rates on the Supreme Court of British Columbia website at www.courts.gov.bc.ca/supreme_court/documents/Discount_Rates_%20Information.pdf which states:

   Under s. 56(2) of the *Law and Equity Act*, RSBC 1996, c. 253, the Chief Justice of the Supreme Court of British Columbia is authorized to make "regulations prescribing:

   > (a) a discount rate that is deemed to be the future difference between the investment rate of interest and the rate of increase of earnings due to inflation and general increases in productivity, and
   >
   > (b) a discount rate that is deemed to be the future difference between the investment rate of interest and the rate of general price inflation."

   The discount rate prescribed under s. 56(2)(a) is used in in [sic] calculating the present value of future damages that are intended to compensate for or are determined with reference to (a) loss of future earnings because of partial or total loss of income earning capacity, or (b) loss of dependency under the Family Compensation Act. The discount rate prescribed under s. 56(2)(b) is used for all other future damages.

   As of April 30, 2014 and pursuant to BC Reg 74/2014 which amended BC Reg 352/81, the prescribed discount rates are as follows:

   - The discount rate prescribed under s. 56(2)(a) is 1.5%.
   - The discount rate prescribed under s. 56(2)(b) is 2.0%.
